

Service Chemical, LLC

Distributor of High Grade Chemicals, Solvents & Raw Materials

Raw Materials From the World's Leading Chemical Manufacturers Provided by Service Chemical, LLC

Service Chemical, a full service supplier of specialty and commodity chemicals, has serviced the manufacturing community since 1962. With warehousing in North Andover and Lawrence, MA, we stock and distribute a wide variety of new generation solvents, industrial cleaners, commodity stocks and specialty solvents. As a proud member of the **Chemical Manufacturers Association of America** and a **Responsible Care[®]** company, Service Chemical, LLC is your single source for chemicals, solvents and other raw materials.

- Environmentally acceptable “green” chemistry alternatives
- Commodity and specialty solvents
- U.N. / D.O.T. approved containers
- Custom blending and formulating
- Total Chemical Management services
- Products for hazardous and flammable liquids management
- Technical and customer service experts

Environmentally Acceptable “Green” Chemistry Alternatives – A wide variety of products and services are available to aid you in toxic use reduction and sourcing replacements for ozone depleting solvents, volatile organic compounds, flammable solvents, hazardous air pollutants and achieving waste minimization.

Commodity and Specialty Solvents - A full line of active solvents, alcohols, and ketones, and inorganic acids, bases, and plating chemicals are available in high purity, reagent, semiconductor and commercial grades.

U.N. / D.O.T. Approved Containers – Containers are available in a variety of types and sizes, from pails, drums, totes and cubic yard containers for shipments of your hazardous and non-hazardous materials that meet or exceed U.N. and D.O.T. regulations.

Custom Blending and Formulating - Custom blending and formulations are available that can help improve your process. Let Service Chemical formulate materials that you may be blending on site to help you reduce your handling of hazardous chemicals.

Total Chemical Management (TCM) – Let Service Chemical handle your chemical procurement and save you money. With the flow of all chemicals to your facilities coming from one conduit, Service Chemical’s TCM solution will aid you in reducing storage, inventory-carrying cost, regulatory reporting and waste minimization due to obsolescence.

Products for Hazardous and Flammable Liquid Management - We carry a wide variety of UL approved safety cans, storage cabinets, drum storage, spill containment supplies and dispensing devices.

Technical and Customer Service Experts - Our staff of dedicated customer service representatives provide information on product availability, delivery schedules and technical bulletins. Our Technical Specialists are committed to working with you to achieve superior process efficiencies.
