Frac Tanks Fact Sheet

Frac Tanks

Clean Harbors provides single-walled frac tanks for onsite storage and separation of contaminated wastewaters. Frac tanks are often used in conjunction with pumps, filters, dewatering units and vacuum boxes as part of a large-scale project.

With over 7,000 various containers in our fleet, our frac tanks are available for immediate delivery to your site.* Real-time tracking of our containers through a bar code labeling system increases efficiency and ensures compliance.

Operating from over 100 locations in North America, we can respond any time and anywhere in the U.S. and Canada with the right container to meet your needs.

* Primarily available in the Northeast. Please contact your nearest Clean Harbors service location for availability.
