

Waste Disposal Services

Open Top Intermodal Containers Fact Sheet

Open Top Intermodal Containers

Clean Harbors provides open top intermodal containers in various sizes to fit your hazardous and non-hazardous disposal needs. These containers are the perfect solution for storing or transporting soil and debris waste types and any solid materials that have minimal free liquids and low-level volatile organic compounds (VOCs). Open top intermodals are ideally suited for jobs where the waste disposal can and should be transported via rail to the end disposal facilities. Since open top intermodals can be transported using a two-can roll-off frame, empty container transportation delivery costs are minimized.

With over 7,000 various containers in our fleet, our open top intermodals are available for immediate delivery to your site. Real-time tracking of our containers through a bar code labeling system increases efficiency and ensures compliance.

Operating from over 100 locations in North America, we can respond any time and anywhere in the U.S. and Canada with the right container to meet your needs.

Features

- Open top intermodals are available in 20, 25 and 30-yard sizes and are easy to clean
- Open top intermodals are ideally suited for rail shipments.
- Bows and tarps cover the materials accumulated inside the container.
- Single or double frame trucks can be utilized to transport intermodals.

Dimensions

Size	20-yard	25-yard	30-yard
Length	20'	20'	20'
Height	5'1"	5'10"	7'10"
Width	8'	8'	8'
Empty Weight	5,940 lbs.	6,080 lbs.	9,680 lbs.

Actual dimensions may vary due to original container manufacturing. All dimensions measured to top horizontal. Castles extend 7" above top horizontal.

Clean Harbors' Comprehensive Container Management Program

- Provides full-service container rental, transportation, waste treatment and disposal options.
- Coordinates all trucks transporting containers through our local service centers and logistics organization.
- Reconfigures containers to support specialty needs.
- Utilizes regional company maintenance facilities for ongoing preventative maintenance.
- Implements an inspection form program to track container maintenance needs.
